Re: UB-04 claim forms no longer require the Medicare EOMB attachment

Dear Kentucky Medicaid Provider:

The Department for Medicaid Services will soon permit providers to submit claims secondary to Medicare, either electronically or on paper without attaching an EOMB.

Providers will be permitted to submit Medicare-primary claims via 837 transactions, through KyHealth Net or on paper. Providers submitting paper UB-04 forms will no longer be required to attach the Medicare EOMB. Providers will instead be asked to include the following information on the claim form.

- The Medicare EOMB date is required in form locator 37;
- The Medicare deductible and/or co-insurance is required in form locator 39 as always;
- The Medicare paid amount is required in form locator 54; and
- The Medicare allowed amount is required in form locator 55.

EDS, fiscal agent for the Department for Medicaid Services, is conducting provider workshops on the new billing procedures. If you are unable to attend, you may obtain a copy of the presentation at www.kymmisis.com or by contacting provider inquiry at 1-800-807-1232. Copies will not be available until after the series of workshops is complete.

You may contact the EDI help desk with questions regarding 837 claim submission or KyHealth Net at 1-800-205-4696. The 837 Companion guides and the KyHealth Net guides (DDE Companion Guides) are also accessible at www.kymmisis.com.

Claims received on or after September 29, 2008 must follow the new procedures. Claims received without the proper information (per the new procedures) may result in a denial or inappropriate reimbursement.

Thank you for choosing to be a Kentucky Medicaid provider.

Sincerely,

Elizabeth A. Johnson
Commissioner
